

Intellia Work & Learn Concept Brochure

Build career-ready skills through real-time project exposure, guided learning, cloud data engineering, AI workflow practice and placement-focused career preparation.

Program Concept

- **WORK:** Learners gain exposure to project-style tasks, delivery workflows, sprint planning, documentation and business problem solving.
- **LEARN:** Mentors explain tools, architecture, implementation methods and interview-ready concepts through practical sessions.
- **REAL IMPACT:** Every learner builds portfolio assets such as dashboards, automation flows, API concepts, data pipelines and case studies.

Core Learning Outcomes

Track	Outcome
Cloud Data Engineering	Data pipelines, ETL workflows, cloud storage, orchestration and monitoring basics
AI Productivity	Prompt workflows, AI-assisted analysis, automation ideas and business use cases
Product Thinking	Understand user needs, feature planning, UI flow, testing and release readiness
Career Readiness	Resume guidance, mock interviews, portfolio storytelling and placement preparation

Who Can Join?

Freshers, career switchers, final-year students and working professionals who want practical IT exposure with mentor-led career preparation.
